Wireless Measurement of the Output Power of a Motor

T24-ACMi-SA
Strain acquisition to measure oil pressure via pressure transducer
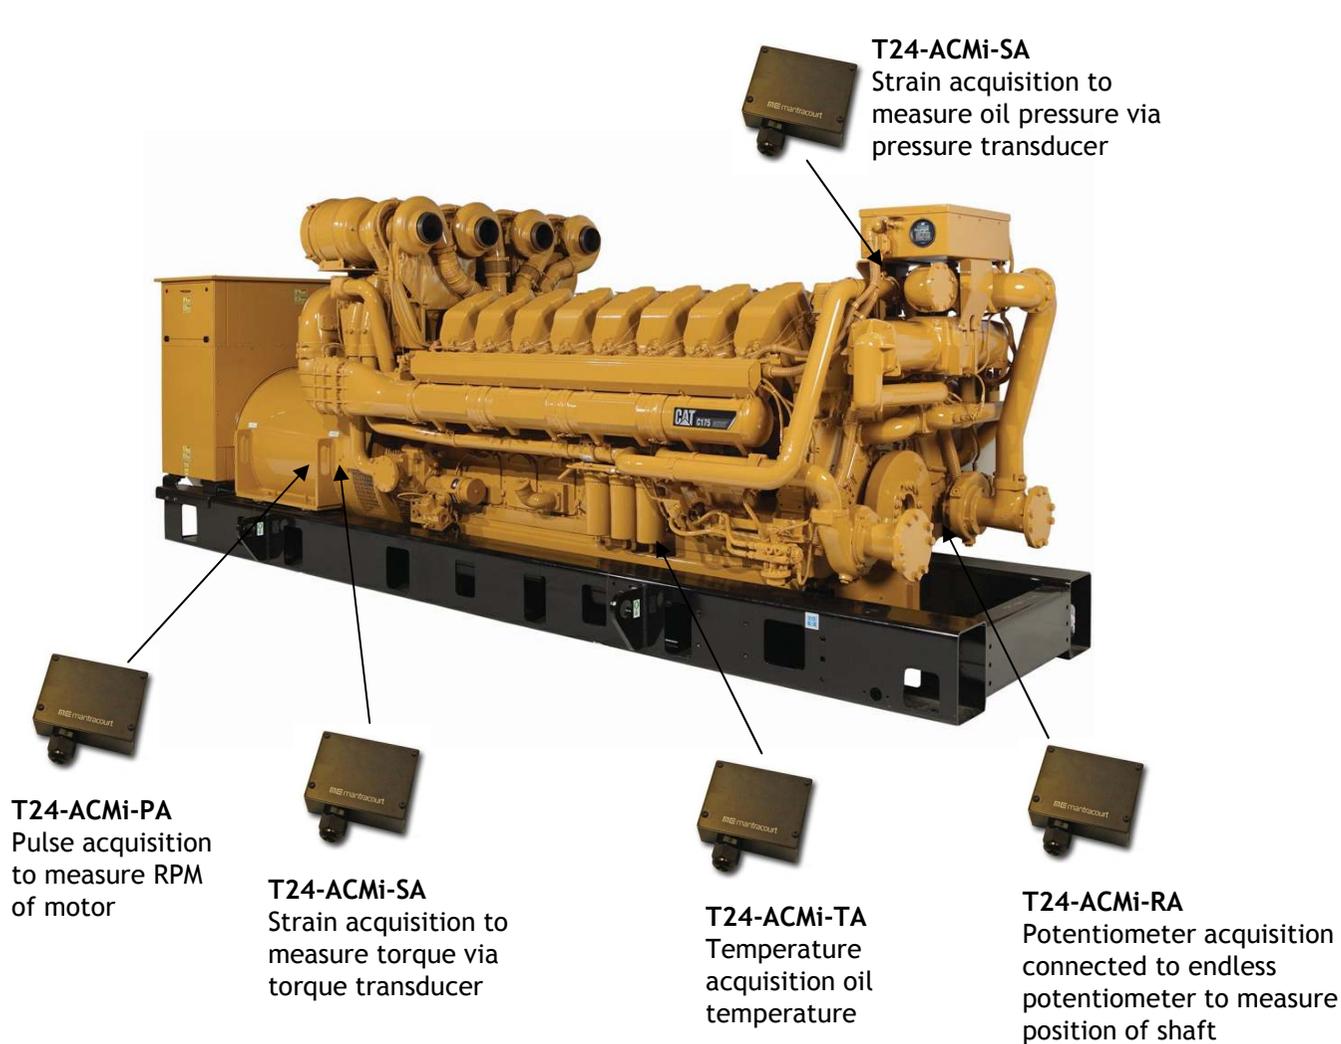

T24-BSi & PC Software
The base station collects the data from all the T24 acquisition modules to log and display the data gathered

T24-ACMi-PA
Pulse acquisition to measure RPM of motor

T24-ACMi-SA
Strain acquisition to measure torque via torque transducer

T24-ACMi-TA
Temperature acquisition oil temperature

T24-ACMi-RA
Potentiometer acquisition connected to endless potentiometer to measure position of shaft

System Features

- IP65 rated
- 200m wireless range
- Easy to install and maintain
- Accurate and reliable
- Licence free worldwide frequency (2.4Ghz)
- Easy to add additional functionality
